# Spring Barley varieties

A winning option for every market

Key Facts

## LAUREATE

The top pick of the malting varieties

- The biggest spring barley variety grown across the UK
- **FULL MBC Approval** for brewing and malt distilling
- High treated and untreated yields with excellent disease resistance
- Strong support from end-users with multiple contracts available for both brewing and malt distilling
- Consistent performance, every year, on farm and with end-users
- High demand, market security

Key Facts

## FAIRING

The choice for grain distilling

- The only spring malting barley with Full MBC Approval for grain distilling
- Specifically bred for the grain distilling market
- Earliest maturing variety on the **AHDB Recommended List**
- The highest resistance rating to Rhynchosporium available
- Fantastic grain quality with high specific weight, low screenings, and high grain nitrogen
- Contracts available in both Scotland and some areas of England

Key Facts

## SY SPLENDOR

A great feed option with weed suppression benefit

- Consistent treated yields across all regions of UK
- Excellent grain quality and starch content
- High tillering and good straw yield
- Rapid growth habit maximising weed competitiveness
- Excellent specific weight protecting grain quality in high weed pressure situations
- Stiff straw, with high lodging and brackling ratings, important to withstand a high weed density

Watch out for the exciting new varieties  
**SY TENNYSON** and **SY SIGNET**
