SY SPLENDOR

Octavia x Dioptric

SY SPLENDOR at a glance

- Consistently high yielding spring barley across all regions
- Excellent specific weight with stiff straw
- Desirable characteristics for grass weed suppression

Yield (% treated controls)

UK	E	W	N
102	102	102	102

Grain Quality

Specific Weight	68.1 kg/hl
% Screenings	2.25 mm ~ 1.4 2.5 mm ~ 3.6

Agronomics

Height (cm)	72
Resistance to lodging (no PGR) (1-9)	7
Resistance to brackling (1-9)	9
Ripening (Days +/- RGT Planet)	+1

SY SPLENDOR is a strong variety in a grass weed situation

Attributes to look for:

Good straw strength

Lodging risk increases with high seed rates or increased inputs

A 7 rating for lodging and 9 for brackling on the AHDB RL 2022

High specific weight

Increased seed rates can have a negative impact on specific weight

Very high specific weight protecting grain quality in difficult years

Good grain size

Grain size becomes more variable with increased seed rates and nitrogen

Big bold grain, with relatively low screenings

SY SPLENDOR has a fantastic combination of agronomic features which makes it a secure variety in a grass weed situation
