Product Plus, Syngenta Publications, FREEPOST RTJT-CXJT-ACTR, PO Box 45, Uttoxeter, ST14 7BR or scan and email to: syngenta.publications@yesresponse.co.uk

syngenta®

EXCLUSIVE NOZZLE OFFER

NEW Syngenta trials show some designs of 90% Drift Reduction technology provide a great combination of efficacy and drift reduction – making them ideal for pre-emergence applications. Now you can get yours for the special price of £4.50/nozzle plus P&P*. The offer is open to all farmers, with no obligation to buy Syngenta's leading pre-emergence grass weed herbicide DEFY.

TOP RECOMMENDATION FOR BEST EFFICACY

TEEJET TTI 110-05:

Great compact and hard wearing drift reducing nozzle – for application at the optimum 200 l/ha for grass weed control.

LECHLER ID120-03:

Proven drift reduction performance at 100 l/ha where grass weed control is less challenging

To claim your nozzles call 0800 652 4216. Payment will be taken by credit card at time of order.

*P&P is £5.50 per order. Offer available for UK residents only. For full terms and conditions visit www.syngenta.co.uk.

90% DRIFT REDUCTION NOZZLE TECHNOLOGY:

Hugely reduce risk of drift onto non-target areas

New designs shown to give good coverage of soil surface

Proven effective for pre-em grass weed herbicides

Enhance sprayer performance

LERAP 3* rating

SYNGENTA BEST USE PRE-EM APPLICATION RECOMMENDATIONS:

Boom height: 50 cm from nozzle tip to target

Forward speed: less than 12 km/hr

Water volume: 200 l/ha

Top application advice: 10 km/hr @ 2.0 bar

In ever more challenging grass-weed conditions 200 l/ha has been shown to give better results, compared to 100 l/ha that had previously worked effectively.
