[The Rothamsted Insect Survey long-term forecasts can be found here.](#) They cover cabbage aphid, peach-potato aphid and potato aphid.

The general message is that, if spring does not throw any abnormal conditions at us, aphids will be flying around 2 weeks earlier than they would be expected to historically

Captures in suction traps in 2018

The tables below summarise the numbers of aphids captured by the network of Rothamsted suction traps in 2018 – some of these counts were not for a full week – more information is on the Insect Survey web site <http://resources.rothamsted.ac.uk/insect-survey/bulletins>.
