

Newark Innovation Centre Black-grass Meeting

Innovation Centres
09.06.2016

Our Innovation Centres are a fantastic opportunity for you to come and see our work in-field to understand what Syngenta can deliver for you. A range of exciting exhibits can be seen this year, focusing on a number of key topics, from conventional product comparisons and variety interaction trials to novel techniques and innovations that will help meet the difficult challenges we face today. The open days are hosted by our local Area Managers and Field Technical Managers who will discuss these topics and answer your questions.

Highlights at Newark Innovation Centre Black-grass Meeting:

Learn about the latest cultural, chemical and application techniques targeting 97% black-grass control:

- Latest trials results demonstrating suppression by HYVIDO® hybrid barley – reduced seed return year-on-year
- Impact of Nitrogen and seed rate on HYVIDO® black-grass suppression
- Stacking pre-emergence herbicides – discover the best combination of black-grass chemicals this season for control and value for money
- Optimising pre-emergence herbicides – recommendations from our application experts, including DEFY 3D nozzle technology
