Dear Resident,

We are writing to advise you of our forthcoming siren test.

We shall be testing our sirens again on Thursday 9th June and the enclosed information will provide you with more information about the test. Please do take time to read about the Community Safety Plan.

Also in this pack, you will find a newsletter of stories which we have posted on our Facebook and Twitter feeds since the last time we wrote to you. We have titled this the 'Community Reporter'.

I am also very pleased to share with you details of our forthcoming Open Day on 17th September, to which you are most welcome to attend. Please read the enclosed newsletter for further details or visit the following website www.syngenta.co.uk/celebrate100.

If you have any further questions after reading the enclosed information, please get in touch.

Yours faithfully,

Carl Sykes
Community Relations Manager

THE COMMUNITY SAFETY PLAN

For Residents and Businesses in the Public Information Zone.

The Syngenta site in Huddersfield has operated as a chemical manufacturing site for 100 years and manufactures a range of premium brand crop protection products, used by farmers to protect crops from pests, disease and weeds. Products made in Huddersfield help farmers get higher yields from their crops, providing better quality food and lower costs for consumers. The Huddersfield site has an important part to play in helping to feed a growing world population and makes a significant contribution to the local economy by way of jobs, apprenticeships and trade.

To meet the requirements of our enclosed Community Safety Plan, we have installed three very distinct, very loud public warning sirens, which will ensure that people nearby are alerted to any incident that may affect them and are able to take the appropriate action. This is a precautionary measure and it is highly unlikely that an incident would occur, affecting people beyond our site boundary. We regularly test our sirens on low volume (so as not to inconvenience people) and on full volume, once every year, this in June.

Safety information is printed on the enclosed card. Please hang this card in a place where you can read it in an emergency. Remember the key message is:

GO IN – STAY IN – TUNE IN

Please note that our emergency telephone number is 01484 554171.

In 2016, the annual test is scheduled for Thursday 9th June between 10.00am and 12.00pm.

The test will last for about 5 minutes on each occasion. This will be a TEST ONLY. You do not need to take any action during these tests.

For local businesses in the area, a template for communicating this advice to your employees can be found at www.syngenta.co.uk/publicinformationzone.

Yours faithfully

A handwritten signature in black ink that reads "Carl Sykes".

Date: May 2016 Our Ref: 2016 COMAH Regs

If calling please ask for: Sean Westerby Tel: 01484 226414

The occupiers of premises in the vicinity of Syngenta Ltd, Leeds Road, Huddersfield

CONTROL OF MAJOR ACCIDENT HAZARDS (COMAH) REGULATIONS 1999

This letter is being sent to you along with information on what to do in an emergency.

Health and Safety Regulations require companies to supply all employers and householders resident within the public information zone of the safety measures to be taken in the event of a major accident at the Huddersfield Manufacturing Site. Please ensure that all members of your household, or all your business employees, are made aware of the information.

Many occupiers will have received similar information in the past, however, for a few people, this will be the first occasion that you will have been notified.

The Council is committed to ensuring that employers and members of the public are informed about risks and more importantly what to do in the event of an emergency.

It should be noted that the Council views public safety issues very seriously and is liaising closely with chemical industries within the Leeds Road corridor of Huddersfield on measures at their plants to reduce off-site risks as far as possible. Safety at the chemical plants is already very high and has improved over the years. The consultation zones are based on regulations which take account of chemicals that have long been in use by the companies.

If you have any queries regarding this letter, please contact Syngenta in the first instance on 01484 537456, or myself on the number above.

Yours faithfully

Sean Westerby
Emergency Planning and Business Continuity Manager

Enc

The Community Safety Plan

For Residents and Businesses in the Public Information Zone

The Syngenta site in Huddersfield has operated as a chemical manufacturing site for 100 years and manufactures a range of premium brand crop protection products, used by farmers to protect crops from pests, disease and weeds. Products made in Huddersfield help farmers get higher yields from their crops, providing better quality food and lower costs for consumers. The Huddersfield site has an important part to play in helping to feed a growing world population and makes a significant contribution to the local economy by way of jobs, apprenticeships and trade.

To meet the requirements of our Community Safety Plan, we have installed three very distinct, very loud public warning sirens, which will ensure that people nearby are alerted to any incident that may affect them and are able to take the appropriate action.

This is a precautionary measure and it is highly unlikely that an incident would occur, affecting people nearby. We regularly test our sirens on low volume (so as not to inconvenience people) and on full volume, once every year.

Q. Why is this information published?

We make chemical products and, as someone who occupies property close to our Manufacturing Centre, under the COMAH Regulations, we have a responsibility to tell you about the Community Safety Plan for this site.

Q. What will this information tell me?

The Community Safety Plan lays down what precautions you should take if an incident occurred which was likely to affect people off site and accordingly, the public warning sirens were sounding.

Q. Are there any particular hazardous substances that I should be aware of?

The COMAH Regulations require companies who handle more than a specified amount of certain chemical substances to tell their neighbours about them. A safety report has been submitted to the Health and Safety Executive and Environment Agency with regard to these matters. You need to be aware that we handle chemical substances which are classified under the regulations as toxic, very toxic, oxidising and flammable. These terms are used widely in industry to describe hazardous substances and can also be found on the labels of many domestic products such as bleach, paints and glue.

Q. What kind of incident could occur?

There are many, many controls in place to prevent incidents from occurring and these controls are regularly audited by both Syngenta and the Regulatory Authorities. This Community Safety Plan itself is in fact, a further control to mitigate impact on people. In the unlikely event of these substances being released in an uncontrolled manner (or affected by fire), there could be an affect on people, if they were to come into direct contact with the resulting fumes or smoke.

People having direct contact with such fumes or smoke may suffer breathing difficulties, watering eyes or skin irritation.

Q. How would I know an incident has occurred?

If nearby residents were at risk, Syngenta would sound its Public warning sirens and residents must follow the advice contained on this card to avoid contact with the fumes or smoke. If direct contact is unavoidable, seek medical attention.

Q. What warning would be given about an incident?

A Public Warning Siren would be sounded and advice would be broadcast on BBC Radio Leeds (92.4FM).

Q. Who else has been involved in drawing up the Community Safety Plan?

All of the following organisations have been involved in preparation of this Community Safety Plan:

- Syngenta
- Kirklees Council
- West Yorkshire Police, Fire & Ambulance Services
- West Yorkshire Fire Authority
- Health and Safety Executive

WHAT TO DO IN AN EMERGENCY

If you would like further information during an emergency, please ring the message line: **Tel No: 01484 554171**

If the powerful siren is sounded continuously for 5 minutes and then for 30 seconds every subsequent 5 minutes

DO

Go indoors immediately and be prepared to offer shelter to others

Extinguish naked flames including pilot lights. Do not smoke.

Shut doors and windows and close off ventilation wherever possible

Listen to BBC Radio Leeds and follow (92.4FM) official advice on news bulletins

DON'T

Collect children from school. Nearby Schools have been notified of this plan. It is safer indoors whilst the siren is sounding.

Do not phone the Emergency Services unless you are injured or hurt. Lines need to be kept free for communications.

Go outside until the 'All Clear' message is broadcast on the radio.

Wait for the '**All Clear**' message to be broadcast over Radio Leeds 92.4FM and follow any further instructions from the Authorities.

Hear the sirens, remember the message

GO IN - STAY IN - TUNE IN

GO INside, you will be safer there.

STAY INside, until you are told it is safe to come out.

TUNE IN to BBC Radio Leeds (92.4FM) who will broadcast bulletins from the Authorities.

IN AN EMERGENCY THE POLICE HAVE ABSOLUTE AUTHORITY

Who to tell

Could we please ask you to ensure that every member of your household, or all employees if you are operating a business in the area, are aware of the precautions described above. Additional copies can be provided on request.

Hearing the siren

Some neighbours have advised us in the past that they have not heard the siren at the time of testing. There are two possible reasons for this; firstly, that the wind direction is such that it has carried the sound away from their home, or secondly that they have been indoors. In both circumstances, neighbours would, in the unlikely event of an emergency, be adequately protected, ie. they would be upwind of the site or indoors, which is the correct action to follow.

If you would like further information during an emergency, please ring the message line: **Tel No: 01484 554171**
