

VELOGY ERA TANK MIX LIST

The following tank mixes have been tested for physical compatibility with VELOGY ERA at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance therefore, use is at the user's own risk. Syngenta UK Ltd will support the physical compatibility of 2 or 3-way tank mixes of VELOGY ERA with any of the fungicides, herbicides, insecticides or PGRs listed. In addition, products **highlighted** have been tested for biological and physical compatibility. For further information on compatibilities, contact Syngenta UK Ltd on 0800 169 6058.

VELOGY ERA + 3C + MODDUS + Ally Max + Starane  
VELOGY ERA + Harmony M SX + Starane

### TRACE ELEMENTS

Syngenta UK Ltd will support the tank mixing of any of the named trace elements with an existing 2 or 3-way tank mix including VELOGY ERA. Syngenta UK Ltd advise that the trace element part of the tank mix is added to the sprayer tank last with constant agitation and the mixture is sprayed without delay.

**Epsa Top (Bittersalz)**  
Headland Copper  
Headland KudoS

Headland KuruS  
**Headland Manganese 15%**  
Headland Maple DF

Headland Promise  
Headland Zinc 700

### NOTES

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

<sup>1</sup>Constant agitation required at all times

Buffer zone: 6 metres  
Rainfastness: After 1 hour

**Use plant protection products safely.  
Always read the label and product information before use.**
