

CAMIX TANK MIX LIST

The following tank mixes have been tested for physical compatibility with CAMIX at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance therefore, use is at the user's own risk. Syngenta UK Ltd will support 2-way tank mixes of CAMIX with any of the herbicides listed. For further information on compatibilities, contact Syngenta UK Ltd on 0800 169 6058.

HERBICIDES

Dow Shield
MILAGRO 400D

Oceal
PEAK

Stomp Aqua

TRACE ELEMENTS

Syngenta UK Ltd will support the tank mixing of one of the named trace elements with any existing 2-way tank mix including CAMIX. Syngenta UK Ltd advise that the trace element part of the tank mix is added to the sprayer tank last with constant agitation and the mixture is sprayed without delay.

Maize Micronutrient Complex

YaraVita Croplift

NOTES

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

Buffer Zone: 5 metres

Rainfastness: 1 hour

**Use plant protection products safely. Always read
the label and product information before use.**
