

## TOPAS TANK MIX LIST

The following tank mixes have been tested for physical compatibility with TOPAS at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance, therefore use is at the user's own risk. Syngenta UK Ltd will support the physical compatibility of 2-way tank mixes of TOPAS with any of the fungicides, insecticides or PGRs listed. For further information on compatibilities, contact Syngenta UK Ltd on 0800 1696058.

### FUNGICIDES

Captan 80WDG	Cuprokylt	Karamate Dry Flo
--------------	-----------	------------------

### INSECTICIDES

Apollo 50SC	Decis Protech	Steward
-------------	---------------	---------

### TRACE ELEMENTS

Syngenta UK Ltd will support the tank mixing of one of the named trace elements with an existing 2 or 3-way tank mix including TOPAS. Syngenta UK Ltd advise that the trace element part of the tank mix is added to the sprayer tank last with constant agitation and the mixture is sprayed without delay.

Calcium chloride	Headland Manganese	YaraVita Seniphos
Headland Copper	Magnesium Sulphate	YaraVita Stopit
Headland Magnesium	Manganese Sulphate	

### NOTES

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

DO NOT apply TOPAS in more than 2000 litres of water per hectare.

LERAP: None.

Rainfastness: 2 hours.

**Use plant protection products safely. Always read the label and product information before use.**
