

PLOVER TANK MIX LIST

The following tank mixes have been tested for physical compatibility with PLOVER at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance, therefore use is at the user's own risk. Syngenta UK Ltd will support the physical compatibility of 2 or 3-way tank mixes of PLOVER with any of the fungicides, herbicides or insecticides listed. For further information on compatibilities, contact Syngenta UK Ltd on 0800 169 6058.

Libspray 211

Stefes Sunburst
Yara Vita Bortrac 150
Yara Vita Liquid Boron
Yara Vita Mantrac Pro

Yara Vita Mantrac DF
Yara Vita Photrel
Yara Vita Stopit

NOTES

The user should ensure that all products to be tank mixed with PLOVER are approved for use on the crops which are to be sprayed. Always refer to other manufacturers' product information when mixing to ensure correct product use. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

Syngenta will only support the tank mixing of PLOVER and Liquid N + Calcium as Stefes Sunburst. Syngenta will NOT support the tank mixing of any other liquid nitrogen formulation with PLOVER.

Syngenta UK Ltd will NOT support an autumn 4-way tank mix with an insecticide.

Use plant protection products safely. Always read the label and product information before use.
