

LUTIMOR TANK MIX LIST

GUIDANCE FOR TANK MIXING AND SEQUENCING WITH HORMONE HERBICIDES

- DO NOT mix LUTIMOR with products containing 2-4,D, MCPA or mecoprop.
- These hormone herbicides may be used in sequence with LUTIMOR, observing the following intervals:
 - When LUTIMOR is applied first, leave a minimum of 7 days before applying hormone herbicides
 - If hormone-containing products are applied first, leave 21 days before LUTIMOR is applied
- Halauxifen (Arylex), fluroxypyr or clopyralid products may be tank mixed with LUTIMOR when LUTIMOR is used at the **full label dose rate** for the target weed (refer to label).
- DO NOT MIX LUTIMOR with Halauxifen (Arylex), fluroxypyr or clopyralid products when targeting black-grass in barley.
- When targeting wild oats or ryegrass using supported doses of LUTIMOR, Halauxifen (Arylex), fluroxypyr or clopyralid products may be sequenced with LUTIMOR observing the same intervals indicated above.

GUIDANCE FOR TANK MIXING AND SEQUENCING WITH SULFONYL-UREAS AND OTHER ALS INHIBITOR HERBICIDES

- Tank mixes with some broad-leaved weed specific sulfonyl-urea/ALS inhibitor herbicides can reduce grass weed control, particularly if LUTIMOR is applied at reduced rates.
- Only sulfonyl-urea/ALS inhibitor herbicides listed below may be tank mixed with LUTIMOR.
- DO NOT MIX LUTIMOR with SU's/ALS inhibitors when targeting black-grass in barley.
- Sulfonyl-urea/ALS inhibitor herbicides should only be tank mixed with LUTIMOR when LUTIMOR is used at the **full label dose rate** for the target weed (refer to label).
- When targeting wild oats or ryegrass using supported rates of LUTIMOR, in sequence with SUs/ALS inhibitors, observe the intervals indicated above for hormone herbicides.

The following tank mixes have been tested for physical compatibility with LUTIMOR at recommended rates of use and will mix in the sprayer tank. Syngenta UK Ltd will support 2 or 3-way tank mixes of LUTIMOR with any of the fungicides, herbicides, insecticides, PGR's or adjuvants listed. All other products listed have not been tested for crop safety or product performance, therefore use is at the user's own risk. For further information on compatibilities, contact Syngenta UK Ltd on 0800 169 6058.

Syngenta have not tested any other adjuvants, however, the use of other MSO's not included in the list above will be supported.

TRACE ELEMENTS

Syngenta UK Ltd will support the tank mixing of **one** of the named trace elements with an existing 2 or 3-way tank mix including LUTIMOR. Syngenta UK Ltd advise that the trace element part of the tank mix is added to the sprayer tank last with constant agitation and the mixture is sprayed without delay.
