Wear protective gloves/protective clothing/eve protection/face protection IF SWALLOWED: Call a POISON CENTRE or doctor/ physician if you feel unwell. IF IN FYES: Binse cautiously with water for several minutes, Bemove contact lenses, if present and easy to do. Continue rinsing Disnose of contents/container to a licensed bazardous waste disnosal contractor or collection site excent for triple rinsed empty containers which can be disposed of as non-hazardous waste MAPP: 12380. PCS No.: 03106. UFI: UJC3-T0D0-W00M-R1M6 Latest Time of application Maximum Total Dose 1.3 litres product per hectare per crop 6 weeks after drilling READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OF-FENCE, FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS. AFTER CONTACT WITH SKIN OR EYES, WASH IMMEDIATELY with plenty of water WASH HANDS AND EXPOSED SKIN before meals and after work.

(b) Environmental protection

Do not contaminate water with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

(c) Storage and disposal KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place, DO NOT RE-USE CONTAINER for any purpose.

RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer at time of filling and dispose of safely.

This leaflet is part of the approved Product Label

DIRECTIONS FOR LISE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be carefully read in order to obtain safe and successful use of this product.

RESTRICTIONS Resistant strains of Pythium spp. may develop against which SL 567A may be ineffective resulting in group loss Consult processor before using on crops for processing

Crop Rotation

SL 567A should not be used where carrots have been grown on the same site within the previous eight years. Levels of Pythium son, in the soil are likely to be increased where carrots or other root crops are included at shorter intervals in the rotation. Such an increased disease inoculum will lead to higher levels of cavity spot on carrots

Integrated Crop Management Strategy

SL 567A is only one component in the crop husbandry package necessary to ensure reduction of 'cavity spot' disorder and production of quality carrots. Consult Syngenta UK Ltd. your agronomist or chemical distributor for the latest information before using SU567A/

Effect of Soil Type on Cavity Spot Control

Trials results show that on mineral soils, control in the order of 60-90% is usually to be expected.

For soils with a high organic matter content a reduction of efficacy may be observed and SL 567A may not give satisfactory levels of control. Trials results show that control in the order of 50-80% is usually to be expected.

N.B. Evidence is becoming available suggesting that the rate of degradation of metalaxyl-M in soil may vary between fields. Where degradation is rapid, then the expected level of "cavity spot" reduction will not be achieved. Addition of extraneous organic material into the soil e.g. sewerage waste or sugar beet tops may also increase the rate of metalaxyl-M degradation, since this acts as an alternative food source and will encourage multiplication of natural microbial levels in the soil.

Period of Protection

Maincrop carrots over wintered in the ground or lifted during the winter may suffer late attacks of "cavity spot" from which the recommended applications of SL 567A may not give expected levels of control

DISEASES CONTROLLED

SL 567A is a soluble liquid containing 465.2 g/l (44.7% w/w) metalaxyl-M which is used as a funcicide for the reduction of "cavity spot" disorder in carrots.

REPEAT I EGAL R

SL 567A is capable of reducing levels of several pathogens known to be associated with "cavity spot" disorder in carrots (Pythium spp.). Pythium violae, the main causative organism is sensitive to metalaxyl-M, but not P. sulcatum, a less important component of the soil microflora

The product label provides information on a specific pesticidal use of the product; do not use otherwise, unless you have assessed any potential hazard involved, the safety measures required and that the particular use has "Extension of Use' approval or is otherwise permitted under the Plant Protection Products Regulations. (UK only)

The information on this label is based on the best available information including data from test results.

This section does not form part of the product label under the Plant Protection Products Regulations 1995.) (UK only)

CROP SPECIFIC INFORMATION Crons

SL 567A may be used on all varieties of carrots. Choose varieties with the highest natural resistance to cavity spot disorder to minimise disease on the root. No varieties have total disease resistance.

Timina

Apply the full dose of \$1,567A as soon as possible affer drilling irrespective of crop growth stage, but no later than 6 weeks post drilling Although soil moisture is required for activity of SL 567A, the moisture level at application is not critical to achieving control of cavity spot. Heavy rain in the period after spraving will reduce the effectiveness of SL 567A. Best results will be achieved when application is made to damp soil.

Dose

1.3 litres SL 567A per hectare

MIXING AND SPRAVING

Spray Volume

Apply the recommended quantity of SL 567A in 1000 litres of water per bectare

Mixing

Make sure the spraver is set to give an even application at the correct volume. Fill the sprav tank with half the required volume of clean water and start agitation. Add the required amount of SL 567A and continue agitation whilst adding the rest of the water. Agitate the mixture thoroughly before use and continue agitation during spraving

Immediately after use, clean the spray equipment thoroughly. Drain the system completely and rinse spray tank, boom and nozzles, two or three times with clean water until the foam and all traces of product have been removed.

SECTION 4. FIRST-AID MEASURES

4.1 Description of first aid measures

General advice Have the product container, label or Safety Data Sheet with you when calling the emergency number, a poison control center or physician or going for treatment

If inhaled : Move the victim to fresh air. If breathing is irregular or stopped, administer artificial respiration. Keep patient warm and at rest. Call a physician or poison control centre immediately.

In case of skin contact : Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation persists, call a physician. Wash contaminated clothing before re-use.

In case of eve contact : Binse immediately with plenty of water, also under the evelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.

If swallowed : If swallowed, seek medical advice immediately and show this container or label. Do NOT induce vomiting,

4.2 Most Important symptoms and effects, both acute and delayed

Symptoms: Nonspecific, No symptoms known or expected.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: There is no specific antidote available. Treat symptomatically

	<u> </u>
SECTION 5. FIRE-FIGHTING MEASURES HE PEINULTIMATE PAGE IS PERIMA	Components
5 1 Extinguishing media	metalaxyI-M (ISO)
Suitable extinguishing media: Extinguishing media - small fires: Use water snay, alcohol-resistant fram dry chemical or	propane-1,2-diol
Suitable extinguishing media: Extinguishing media - small fires: Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.	IL INEPERS
Extinguishing media - large fires: Alcohol-resistant foam	
Unsuitable extinguishing media: Do not use a solid water stream as it may scatter and spread fire.	heptan-2-one
5.2 Special hazards arising from the substance or mixture	
Specific hazards during firefighting: As the product contains combustible organic components, fire will produce dense black smoke	
containing hazardous products of combustion (see section 10). Exosure to decomposition products may be a hazard to health. Flash back possible over considerable distance.	EVCE C/V/I.
Flash back possible over considerable distance.	EAJE JVVI
5.3 Advice for firefighters	
Special protective equipment for firefighters: Wear full protective clothing and self-contained breathing apparatus. Further information : Do not allow run-off from fire fighting to enter drains or water courses: Cool closed containers exposed to fire	
Further information : Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire	I EN IN INL
with water spray.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions - Befer to protective measures listed in sections 7 and 8. Keep people away from and unwind of spill/leak Reware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition Pay attention to flashback A_{2} JESSAR

6.2 Environmental precautions

Invironmental preclations - Prevent further leakage or spillage if safe to do so. Do not flush into surface water or sanitary sewer system. If the product contaminates rivers and lakes or drains inform respective authorities

6.3 Methods and material for containment and cleaning up

Methods for cleaning up - Contain spillage and then collect with non-combustible absorbent material (e.g. sand earth diatomaceous earth verniculite) and place in containing of the second in the local / national regulations (see section 13). Clean contaminated surface thoroughly. Clean with detergents. Avoid solvents, Betain and dispose of contaminated wash water

6.4 Reference to other sections

For disposal considerations see section 13., Refer to protective measures listed in sections 7 and 8.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling : Avoid contact with skin and eves. When using do not eat, drink or smoke. Use only in an area containing flame proof equipment Take precautionary measures against static discharges. For personal protection see section 8

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers: Keep containers tightly closed in a dry, cool and wellventilated place. Keep out of the reach of children. Keep away from combustible material. Keep in an area equipped with sprinklers. Keep away from food, drink and animal feedingstuffs. No smoking, Further information on storage stability: Physically and chemically stable for at least 2 years when stored in the original unopened sales container at ambient temperatures.

8.2 Exposure controls Engineering measures

Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated. The extent of these protection measures depends on the actual risks in use. Maintain air concentrations below occupational exposure standards. Where necessary, seek additional occupational hygiene advice.

Personal protective equipment

Eye protection: Tightly fitting safety goggles. Always wear eye protection when the potential for inadvertent eye contact with the product cannot be excluded. Equipment should conform to EN 166

Hand protection

Remarks : No special protective equipment required.

Skin and body protection : No special protective equipment required. Select skin and body protection based on the physical job requirements.

Respiratory protection : No personal respiratory protective equipment normally required. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Protective measures : The use of technical measures should always have priority over the use of personal protective equipment.

When selecting personal protective equipment, seek appropriate professional advice. NECECCADY /

acetonhenone:

Biodegradability : Result: Readily biodegradable.

amines, tallow alkyl, ethoxylated:

Biodegradability : Result: Readily biodegradable.

12.3 Bioaccumulative potential

Components:

metalaxyI-M (ISO):

Bioaccumulation : Remarks: Low bioaccumulation potential. Partition coefficient: noctanol/ water: log Pow: 1 71 (25 °C)

12.4 Mobility in soil

Components:

metalaxyl-M (ISO):

Distribution among environmental compartments: Remarks: Metalaxyl has a range from low to very high mobility in soil depending on soil type.

FHESE PAGES CAN BE ADDED

TO CREATE A 4.8.12.

Stability in soil : Dissipation time: < 50 d

Percentage dissipation: 50 % (DT50)

Remarks: Product is not persistent.

12.5 Results of PBT and vPvB assessment

Product:

Assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Components:

metalaxyl-M (ISO):

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

acetophenone:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

dodecylbenzene sulphonic acid:

Assessment : This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

Product: Assessment : The substance/mixture does not contain components considered to have endocrine disrupting properties according to

PRACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

12.7 Other adverse effects

No data available

SECTION 13. DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Product: Do not contaminate ponds, waterways or ditches with chemical or used container. Do not dispose of waste into sever. Where possible recycling is preferred to disposal or incineration. If recycling is not practicable, dispose of in compliance with local regulations. Contaminated packaging: Empty remaining contents. Triple rinse containers. Empty containers should be taken for local recycling or waste disposal. Do not re-use empty containers. Waste Code: uncleaned packaging. 15 01 10, packaging containing residues of or contaminated by hazardous substances

SECTION 14. TRANSPORT INFORMATION

14.1 UN number or ID number 14.5 Environmental hazards Not regulated as a dangerous good Not regulated as a dangerous good 14.2 UN proper shipping name AS Not regulated as a dangerous good 14.6 Special precautions for user Not applicable 14.7 Martime transport in bulk according to IMO instruments

14.3 Transport hazard class(es)

14 4 Packing group

Not regulated as a dangerous good

SECTION 15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

REACH - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, preparations and articles (Annex XVIII): Conditions of restriction for the following entries should be considered: Number on list 3 bentan-2-one

Not applicable for product as supplied

REACH - Candidate List of Substances of Very High Concern for Authorisation (Article 59).: Not applicable

REACH - List of substances subject to authorisation (Annex XIV): Not applicable

Regulation (EC) No 1005/2009 on substances that deplete the ozone laver: Not applicable

Regulation (EU) 2019/1021 on persistent organic pollutants (recast): Not applicable

Regulation (EC) No 649/2012 of the European Parliament and the Council concerning the export and import of dangerous chemicals: Not applicable

Seveso III: Directive 2012/18/EU of the European Parliament and of the Council on the control of major-accident hazards involving dangerous substances. Not applicable

Other regulations:

214 x

Take note of Directive 98/24/EC on the protection of the health and safety of workers from the risks related to chemical agents at work. Use plant protection products safely. Always read the label and product information before use. Take note of Directive 92/85/ ECC regarding matemity protection or stricter national regulations, where applicable.

15.2 Chemical safety assessment

A Chemical Safety Assessment is not required for this substance when it is used in the specified applications.

SECTION 16. OTHER INFORMATION

Further information

 Classification of the mixture:
 Classification procedure:

 Acute Tox. 4
 H302
 Based on product data or assessment

 Eye Irrit. 2
 H319
 Based on product data or assessment

 Aquatic Chronic 3
 H412
 Calculation method

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process unless VANENTLY AFFIXED TO THE BOTTLE, specified in the text.

Product names are a trademark or registered trademark of a Syngenta Group Company. REPEAT LEGAL REQUIREMENTS IF NECESSARY (eg. FRONT PAGE)

IF USING A REPEAT PAGE, PLEASE SWITCH ON VISIBILITY OF 'REPEAT PAGE' LAYER IN INDESIGN FILE

THESE PAGES CAN BE ADDED OR REMOVED AS NECESSARY TO CREATE A 4, 8, 12, OR 16 PAGE BOOKLET (INCLUDING GLUE PAGE)

> TEXT AREA 214 x 114 mm

THE PENULTIMATE PAGE IS PERMANENTLY AFFIXED TO THE BOTTLE, REPEAT LEGAL REQUIREMENTS IF NECESSARY (eg. FRONT PAGE)

IF USING A REPEAT PAGE, PLEASE SWITCH ON VISIBILITY OF 'REPEAT PAGE' LAYER IN INDESIGN FILE

syngenta

Ξ

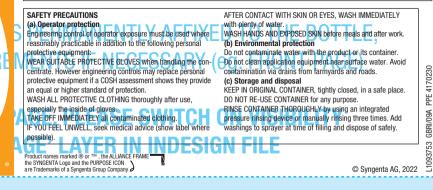

Soluble Liquid containing 465.2 g/l (44.7% w/w) metalaxyl-M

A soil-applied fungicide for the reduction of "cavity spot" disorder in carrots.

FOR PROFESSIONAL USE ONLY To avoid risks to human health and the environment comply with the instructions for use. 085006 Soluble Liquid containing 465.2 g/l (44.7% w/w) metalaxyl-M. THESE PAGES CAN BE A NFCFSSARY Warning Warmful if swallowed Causes serious eve irritation Harmful to aquatic life with long lasting effects. Keen out of reach of children Avoid release to the environment. Wear protective gloves/protective clothing/eve protection/face protection. IE SWALLOWED: Call a POISON CENTRE or doctor/ physician if you feel unwell IF IN FYES: Binse cautiously with water for several minutes. Bemove contact lenses, if present and easy to do. Continue rinsing If eve irritation persists: Get medical advice/attention Collect spillage Dispose of contents/container to a licensed bazardous waste disposal contractor or collection site excent for triple rinsed empty. containers which can be disposed of as non-hazardous waste MAPP: 12380. PCS No.: 03106. UFI: UJC3-T0D0-W00M-B1M6 IMPORTANT INFORMATION FOR USE ONLY AS AN AGRICULTURAL FUNGICIDE For use on Carrots 4 Maximum Individual Dose Maximum Total Dose Latest Time of application 1.3 litres product per hectare per crop 1.3 litres product per hectare 6 weeks after drilling READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OF-FENCE, FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.
