# **Choriste**®

## syngenta.

## GROUP 27 2 HERBICIDES

Oil based dispersion formulation containing 75 g/litre of mesotrione and 30 g/litre nicosulfuron.

Herbicide for the moderate control of perennial grass weeds, and the control of annual grass and broad-leaved weeds in maize.

## The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

In case of toxic or transport emergency ring +44 (0)1484 538444 any time.

SHAKE WELL BEFORE USE PROTECT FROM FROST

This product label is compliant with the CPA Voluntary Initiative (VI) guidance

The Voluntary Initiative

#### **CHORISTE®**

Oil based dispersion formulation containing 75 g/litre mesotrione and 30 g/litre nicosulfuron.

#### Warning

Suspected of damaging the unborn child. Very toxic to aquatic life with long lasting effects. Keep out of reach of children. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/ protective clothing/ eye protection/ face protection. IF exposed or concerned: Get medical advice/attention. Collect Spillage.

Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site except for empty triple rinsed clean containers which can be disposed of as non-hazardous waste. To avoid risks to human health and the environment, comply with the instructions for use.

#### IMPORTANT INFORMATION

FOR USE ONLY AS A PROFESSIONAL HERBICIDE

| Сгор                   | Maximum individuals<br>dose (litresgo/NOM D<br>product/ha)OMBRE D | number of  | Latest time of application |
|------------------------|---|------------|----------------------------|
| Grain and Forage Maize | 1.5   | 1 per crop | 8 leaves unfolded (GS 18)  |
| (open crops only)      | 8   |            | 105                        |

Other Specific Restriction:

Do not apply by hand-held equipment.

To avoid the build up of resistance do not apply this or any other product containing an ALS inhibitor herbicide with claims for control of grass-weeds more than once to any crop.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

#### SAFETY PRECAUTIONS

#### (a) Operator protection

AVOID ALL CONTACT WITH SKIN. WASH HANDS AND EXPOSED SKIN before eating and drinking and after work. FOR USE BY TRACTOR MOUNTED/TRAILED SPRAYER ONLY.

#### (b) Environmental protection

To protect aquatic organisms respections a unsprayed buffer zone distance to surface water bodies in line with LERAP requirements. DO NOT ALLOW DIRECT SPRAY from horizontal

LERAP B

boom sprayers to fall within 5m of the top of the bank of a static or flowing waterbody, unless a Local Environmental Risk Assessment for Pesticide

(LERAP) permits a narrower buffer zone, or within 1m of the top of a ditch which is dry at the time of application. Aim spray away from water. This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with the 'Local Environment Risk Assessment for Pesticides Horizontal Boom Sprayers' booklet available from the HSE Chemicals Regulation Division's website or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for three years.

DO NOT CONTAMINATE WATER WITH THE PRODUCT OR ITS CONTAINER.

Do not clean application equipment near surface water.

Avoid contamination via drains from yards and roads.

Extreme care must be taken to avoid spray drift onto non-crop plants outside of the target area.

#### (c) Storage and disposal

KEEP IN ORIGINAL CONTAINER, tightly closed in a safe place.

RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer at time of filling and dispose of safely.

## DIRECTIONS FOR USES CAN BE ADDED OR REMOVED AS NECESSARY

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be carefully read in order to obtain safe and successful use of this product.

#### RESTRICTIONS

- Do not apply to sweetcorn, maize grown for seed production or grown in production of inbred lines.
- Do not treat with CHORISTE<sup>®</sup> once a soil insecticide based on an organophosphate such as phorate has been applied.
- Do not mix with foliar or liquid fertilisers.
- Do not apply in sequence or in tank-mix with a product containing any other sulfonylurea.
- Under certain conditions, some transient yellowing and/or crop stunting and/or loss of vigour can be seen after treatment. This is quickly outgrown and no yield effect has been shown.
- Applications should not be made to maize crops that are under stress, as this may lead to incidences of more persistant crop damage. Apply product at the recommended dose rate to a healthy crop.
- Strains of some annual weeds (e.g. black-grass, wild-oats, and Italian rye-grass) have developed
  resistance to herbicides which may lead to poor control. A strategy for preventing and managing
  such resistance should be adopted. Guidelines have been produced by the Weed Resistance
  Action Group and copies are available from the AHDB, CPA, your distributor, crop advisor or
  product manufacturer.
- Avoid the use of CHORISTE, or any other ALS inhibitor herbicide, as a sole means of grass and broad-leaved weed control in successive crops. A REA
- Some flower deformation may be seen on particular sensitive varieties e.g. Abraxas, Fjord and Rival.
- Take extreme care to avoid drift onto non-crop plants outside the target area.
- Take extreme care to avoid drift onto all crops ouside the target area, otherwise crop damage will
  result.
- Avoid overlapping spray swaths, as considerable crop damage may occur which may not grow out and could lead to yield reductions.
- Ensure spraying equipment is thoroughly washed out according to officially approved guidelines or regulations.
- Only dispose of washings, split material and packaging according to officially approved guidelines or regulations.
- The freshly treated area must not be grazed, no food or feed collected from it.
- Do not enter treated areas before spray deposit on leave surfaces has dried, unless protective clothing is worn.
- Use of CHORISTE is not recommended for use in more than 2 consecutive seasons at a time in continuous maize production.

#### WEEDS CONTROLLED

CHORISTE can be used to control the following weeds in maize. For best results CHORISTE should be applied when weeds are small and actively growing. Do not spray when weed or crop foliage is wet.

| TO CRE                 | ATE A 20, 24, 28, OR 32 P/<br>Common name | GE BOOKLET.                     |  |

| Moderately susceptible | Couch grass                               | 21 (1 tiller)                   |  |
| Moderately resistant   | Knotgrass                                 | 36 (6 nodes)                    |  |

CHORISTE gives useful control of the top growth of Common couch in the year of application, but reduction of growth in the following year has not been established.

#### WEED RESISTANCE

This product contains nicosulfuron which is an ALS inhibitor, also classified by the HRAC as 'Group 2' and mesotrione which is an HPPD inhibitor, also classified by HRAC as 'Group 27'.

Use CHORISTE only as a part of a resistance strategy that includes cultural methods of control and does not use ALS inhibitors as the sole chemical method of grass-weed control.

There is potential for resistance to develop to CHORISTE if the product is used alone in monoculture over a number of years. CHORISTE should not be used for more than 2 years in a row without a break in situations of continuous maize production. CHORISTE should be used in mixture or in sequence with herbicides with other modes of action, particularly in continuous maize, as part of a weed resistance management plan. Crop rotation, in which using herbicides with different mode of action, can be practised as an alternative to reduce risk of development of resistance.

#### **CROP SPECIFIC INFORMATION**

#### Timing and Rates of Use

CHORISTE should be applied to the maize crop from the 2 leaf stage of the crop to no later than the 8 leaf stage. Refer to maximum weed growth stage limits approved. Apply CHORISTE at 1.5 litres per hectare.

#### FOLLOWING CROPS AND RECULTIVATION

Recultivation

Forage maize and grain maize can be re-seeded immediately after ploughing in the case of crop failure.

Rotational crops

#### <u>Autumn</u>

Winter wheat and winter barley can follow a forage maize and grain maize crop treated with CHORISTE provided the soil has been ploughed to a depth of 15cm.

#### Spring

#### MIXING AND SPRAYING

#### Preparation of the spray solution

Shake thoroughly the CHORISTE container. Half fill the spray tank with clean water and begin agitation. Add the required quantity of CHORISTE to the tank and complete filling. Continue agitation until spraying is completed.

#### Application

Application of CHORISTE will be achieved by using conventional ground spraying equipment at water volumes of 100-400 L/ha. Apply using a medium quality spray (BCPC) at a pressure of at least 2 bar. Even cover of weeds is essential.

#### After Use

Disposal of spray tank washings should be in accordance with local, state or national legislation.

#### Tank cleaning procedure

The following cleaning procedure is recommended:

- 1. Drain tank completely then flush tank, boom and hoses with clean water. Drain again.
- Half fill the tank with clean water and add a detergent (e.g. Bonus<sup>™</sup> 100 mL/200L water) or a sodium hypochlorite based solution. Flush through boom and hoses and then allow standing for 10 minutes with agitation. Drain completely.

- 3. To remove traces of detergent, rinse the tank with clean water and flush through booms and hoses.
- 4. Repeat step 2. DAOLO CAN DE ADDED OD DEMOVED AC NEOECOADY
- Repeat step 2.
   Nozzles and filters must be removed and cleaned separately with the detergent solution at the
- same concentration as above. A 20 24 28 OB 32 PAGE BOOKLET
- 6. Any contamination on the outside of the spraying equipment should be removed by washing with clean water. (INCLUDING GLUE PAGE)

#### SOIL CONDITIONS

CHORISTE can be used on all soils (light, medium and heavy soils). High organic material content in soil may impair activity.

#### Section 6 of the Health and Safety at Work Act Additional Product Safety Information

(This section does not form part of the product label under the Plant Protection Products Regulations 1995.)

The product label provides information on a specific pesticidal use of the product; do not use otherwise, unless you have assessed any potential hazard involved, the safety measures required and that the particular use has 'extension of use' approval or is otherwise permitted under the Plant Protection Products Regulations.

The information on this label is based on the best available information including data from test results.

#### SAFETY DATA SHEET v9.1

#### SECTION 4. FIRST-AID MEASURES

#### 4.1 Description of first aid measures

General Advice: Have the product container, label or Material Safety Data Sheet with you when calling the Syngenta emergency number, a poison control centre or physician, or going for treatment. If inhaled: Move the victim to fresh air. If breathing is irregular or stopped, administer artificial respiration. Keep patient warm and at rest. Call a physician or poison control centre immediately.

In case of skin contact: Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation persists, call a physician. Wash contaminated clothing before re-use.

In case of eye contact: Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.

If swallowed: If swallowed, seek medical advice immediately and show this container or label. Do NOT induce vomiting.

#### 4.2 Most Important symptoms and effects, both acute and delayed

Symptoms: Nonspecific. No symptoms known or expected.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: There is no specific antidote available. Treat symptomatically.

#### SECTION 5. FIRE-FIGHTING MEASURES $\times 130 \text{ mm}$

#### 5.1 Extinguishing media

Extinguishing media - small fires

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Extinguishing media - large fires

Use alcohol-resistant foam or Water spray.

Unsuitable extinguishing media: Do not use a solid water stream as it may scatter and spread fire.

#### 5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting: As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health.

#### 5.3 Advice for firefighters

Special protective equipment for firefighters: Wear full protective clothing and self-contained breathing apparatus.

Further information: Do not allow run-off from fire fighting to enter drains or water courses. Cool closed containers exposed to fire with water spray.

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Refer to protective measures listed in sections 7 and 8.

#### 6.2 Environmental precautions

Environmental precautions: Prevent further leakage or spillage if safe to do so. Do not flush into surface water or sanitary sewer system. If the product contaminates rivers and lakes or drains inform respective authorities.

#### 6.3 Methods and materials for containment and cleaning up

Methods for cleaning up: Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Clean contaminated surface thoroughly. Clean with detergents. Avoid solvents. Retain and dispose of contaminated wash water.

#### 6.4 Reference to other sections (INCLUDING GLUE PAGE

Refer to protective measures listed in sections 7 and 8. Refer to disposal considerations listed in section 13.

#### SECTION 7. HANDLING AND STORAGE

#### 7.1 Precautions for safe handling

No special protective measures against fire required. Avoid contact with skin and eyes. When using, do not eat, drink or smoke. For personal protection see section 8.

#### 7.2 Conditions for safe storage, including any incompatibilities

No special storage conditions required. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feeding stuffs.

#### 7.3 Specific end use(s)

For proper and safe use of this product, please refer to the approval conditions laid down on the product label.

#### SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

#### 8.1 Control parameters

#### **Occupational Exposure Limits**

Engineering Measures: Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated. The extent of these protection measures depends on the actual risks in use. If airborne mists or vapors are generated, use local exhaust ventilation controls. Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit. Where necessary, seek additional occupational hygiene advice.

#### Personal protective equipment

Eye protection: No special protective equipment required

Hand protection

Material: Nitrile rubber

Break through time: > 480 min

Glove thickness: 0.5 mm

Remarks: Wear protective gloves. The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin and body protection: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Remove and wash contaminated clothing before re-use. Wear as appropriate: Impervious clothing

Respiratory protection: No personal respiratory protective equipment normally required. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Protective measures: The use of technical measures should always have priority over the use of personal protective equipment. When selecting personal protective equipment, seek appropriate professional advice.

Assessment: This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

#### mesotrione (ISO):

Assessment: This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

#### nicosulfuron:

Assessment: This substance is not considered to be persistent, bioaccumulating and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

#### 12.6 Other adverse effects

#### Product:

Endocrine disrupting potential: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

#### SECTION 13. DISPOSAL CONSIDERATIONS

#### 13.1 Waste treatment methods

Product: Do not contaminate ponds, waterways or ditches with chemical or used container. Do not dispose of waste into sewer. Where possible recycling is preferred to disposal or incineration. If recycling is not practicable, dispose of in compliance with local regulations.

Contaminated packaging: Empty remaining contents. Triple rinse containers. Empty containers should be taken for local recycling or waste disposal. Do not re-use empty containers.

#### 14.6 Special precautions for user

The transport classification(s) provided herein are for informational purposes only, and solely based upon the properties of the unpackaged material as it is described within this Safety Data Sheet. Transportation classifications may vary by mode of transportation, package sizes, and variations in regional or country regulations.

#### 14.7 Transport in bulk according to Annex II of Marpol and the IBC Code

Not applicable for product as supplied.

#### SECTION 15. REGULATORY INFORMATION

#### 15.1 Safety, health and environmental regulation/legislation specific for the substance or mixture

Relevant EU provisions transposed through retained EU law

UK REACH List of restrictions (Annex 17): Conditions of restriction for the following entries should be considered: Number on list 3

Regulation (EC) No 1005/2009 on substances that deplete the ozone layer: Not applicable

UK REACH List of substances subject to authorisation (Annex XIV): Not applicable

GB Export and import of hazardous chemicals - Prior Informed Consent (PIC) Regulation: Not applicable Control of Major Accident Hazards Regulations 2015 (COMAH) E1 ENVIRONMENTAL HAZARDS

#### 15.2 Chemical safety assessment

A Chemical Safety Assessment is not required for this substance when it is used in the specified applications.

#### SECTION 16. OTHER INFORMATION

#### Full text of H-statements

- H361d Suspected of damaging the unborn child.
- H373 May cause damage to organs through prolonged or repeated exposure.
- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long lasting effects.
- H412 Harmful to aquatic life with long lasting effects.

Other Specific Restriction:

Do not apply by hand-held equipment.

To avoid the build up of resistance do not apply this or any other product containing an ALS inhibitor herbicide with claims for control of grass-weeds more than once to any crop.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.

#### SAFETY PRECAUTIONS

#### (a) Operator protection

AVOID ALL CONTACT WITH SKIN. WASH HANDS AND EXPOSED SKIN before eating and drinking and after work. FOR USE BY TRACTOR MOUNTED/TRAILED SPRAYER ONLY. 98 X 1

#### (b) Environmental protection

To protect aquatic organisms respect an unsprayed buffer zone distance to surface water bodies in line with LERAP requirements. DO NOT ALLOW DIRECT SPRAY from horizontal

boom sprayers to fall within 5m of the top of the bank of a static or flowing waterbody, unless a Local Environmental Risk Assessment for Pesticide

(LERAP) permits a narrower buffer zone, or within 1m of the top of a ditch which is dry at the time of application. Aim spray away from water. This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. Before each spraying operation from a horizontal boom sprayer, either a LERAP must be carried out in accordance with the 'Local Environment Risk Assessment for Pesticides Horizontal Boom Sprayers' booklet available from the HSE Chemicals Regulation Division's website or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for three years.

DO NOT CONTAMINATE WATER WITH THE PRODUCT OR ITS CONTAINER.

Do not clean application equipment near surface water.

Avoid contamination via drains from yards and roads.

Extreme care must be taken to avoid spray drift onto non-crop plants outside of the target area.

#### (c) Storage and disposal

KEEP IN ORIGINAL CONTAINER, tightly closed in a safe place.

RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer at time of filling and dispose of safely. NO TEXT HERE GLUE PAGE 97 x 134 mm
