

AXIAL PRO TANK MIX LIST

GUIDANCE FOR TANK MIXING AND SEQUENCING WITH HORMONE HERBICIDES

- DO NOT mix AXIAL Pro with products containing 2-4,D, MCPA or mecoprop.
- These hormone herbicides may be used in sequence with AXIAL Pro, observing the following intervals:
 - When AXIAL Pro is applied first, leave a minimum of 7 days before applying hormone herbicides
 - If hormone-containing products are applied first, leave 21 days before AXIAL Pro is applied
- Halauxifen (Arylex), fluroxypyr or clopyralid products may be tank mixed with AXIAL Pro when AXIAL Pro is used at the **full label dose rate** for the target weed (refer to label).
- DO NOT MIX AXIAL Pro with Halauxifen (Arylex), fluroxypyr or clopyralid products when targeting black-grass in barley.
- When targeting wild oats or ryegrass using supported doses of AXIAL Pro, then Halauxifen (Arylex), fluroxypyr or clopyralid products may be sequenced with AXIAL Pro observing the same intervals indicated above.

GUIDANCE FOR TANK MIXING AND SEQUENCING WITH SULFONYL-UREAS AND OTHER ALS INHIBITOR HERBICIDES

- Tank mixes with some broad-leaved weed specific sulfonyl-urea/ALS inhibitor herbicides can reduce grass weed control, particularly if AXIAL Pro is applied at reduced rates.
- Only sulfonyl-urea/ALS inhibitor herbicides listed below may be tank mixed with AXIAL Pro.
- DO NOT MIX AXIAL Pro with SU's/ALS inhibitors when targeting black-grass in barley.
- Sulfonyl-urea/ALS inhibitor herbicides should only be tank mixed with AXIAL Pro when AXIAL Pro is used at the **full label dose rate** for the target weed (refer to label).
- When targeting wild oats or ryegrass using supported rates of AXIAL Pro, in sequence with SUs/ALS inhibitors, observe the intervals indicated above for hormone herbicides.

The following tank mixes have been tested for physical compatibility with AXIAL Pro at recommended rates of use and will mix in the sprayer tank. Syngenta UK Ltd will support 2 or 3-way tank mixes of AXIAL Pro with any of the fungicides, herbicides, insecticides, PGR's or adjuvants listed. All other products listed have not been tested for crop safety or product performance, therefore use is at the user's own risk. For further information on compatibilities, contact Syngenta UK Ltd on 0800 169 6058.
