MILDEW 8

BROWN RUST 5

RHYNCHOSPORIUM 6

RAMULARIA 6

Standing Power

Height no PGR (cm): 70

Resistance to lodging (1-9): 7

Resistance to brackling (1-9): 8

Nitrogen Advice:

Total N applied should be in line with end use contracts

LAUREATE AT A GLANCE

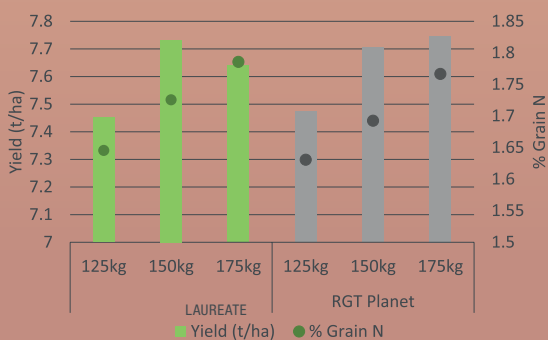

- Carries Full IBD Approval for Brewing and Distilling
- Very high yielding non-GN spring barley
- High yielding in all regions with strong agronomics and disease profile
- Contracts available for brewing and distilling

LAUREATE SHOWS HIGH PERFORMANCE IN BOTH END MARKETS

LAUREATE can be grown for both brewing and malt distilling, but these two markets require a different % grain N in order to make either beer or whisky. It is important to know which market your grain is going to, so you can tailor your nitrogen inputs and achieve the right specification for the market you are growing for.

LAUREATE FOR BREWING

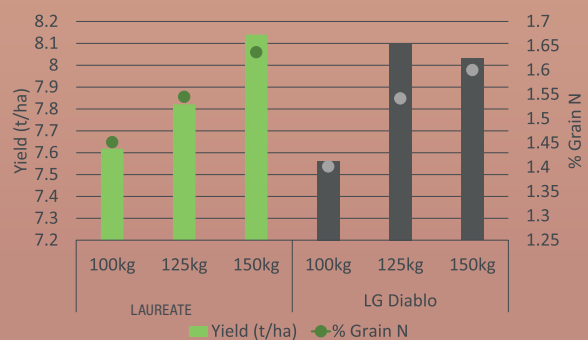

- Aim for a % grain N of 1.6-1.75%.
- 2 splits of nitrogen will help achieve higher % N.

Source: SYN N trials 2017-20 (Mean 11 sites across England)

LAUREATE FOR MALT DISTILLING

- Aim for a % grain N of below 1.65%.
- 100% application of nitrogen in the seedbed will help keep the nitrogen lower.

Source: SYN N trials 2019-20 (Mean 6 sites across Scotland)
