RGT Planet x Ovation

SY TUNGSTEN AT A GLANCE

- Strong, consistent yields
- Excellent Northern yields
- High specific weight and good straw strength

Maturity +1

Carries the mildew resistance gene

Grain Quality

Specific weight: 67.7 kg/hl

% Screenings

2.25 mm ~ 1.7

2.5 mm ~ 4.5

High Yields

UK	E	W	N
103	101	103	104

MLDEW 8

BROWN RUST 4

RHYNCHOSPORIUM 3

Robust Agronomics

Height (cm): 71

Resistance to lodging (no PGR) (1-9): 7

Resistance to brackling (1-9): 8

Recommended Seed Rate:

England:

December: 325 seeds/m²

January-February: 350 seeds/m²

March: 350-375 seeds/m²

Scotland:

January-February: 425 seeds/m²

March: 450-475 seeds/m²

HIGH YIELDING FEED OPTION FOR THE NORTH

SY TUNGSTEN

combines high yields and excellent grain quality, making it an excellent option for the feed market in the North

High yields

- One of the highest yielding spring barley's in the North with 104% CM

Quality

- Higher specific weight than all other varieties that have high yields in the North

Agronomics

- Maturity similar to LAUREATE
- Strong 7 rating for lodging resistance and 8 for brackling resistance
