A suspension concentrate formulation containing 500 g/l (40.4% w/w) chlorothalonil.

A non-systemic broad spectrum fungicide for disease control in winter and spring wheat and winter and spring barley.

The (COSHH) Control of Substances Hazardous to Health Regulations may apply to the use of this product at work.

SAFETY PRECAUTIONS
(a) Operator protection
Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:
WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the concentrate.
WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), AND SUITABLE PROTECTIVE GLOVES when handling contaminated surfaces.
However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.

(b) Environmental protection
To protect aquatic organisms, respect an unsprayed buffer zone distance to surface water bodies in line with LERAP requirements.
DO NOT ALLOW DIRECT SPRAY from horizontal boom sprayers to fall within 5 m of the top of the bank of a static or flowing waterbody, unless a Local Environmental Risk Assessment for Pesticides (LERAP) permits a narrower buffer zone, or within 1 m of the top of a ditch which is dry at the time of application. DO NOT ALLOW DIRECT SPRAY from hand held sprayers to fall within 1 m of the top of the bank of a static or flowing waterbody. Aim spray away from water.
This product qualifies for inclusion within the Local Environmental Risk Assessment for Pesticides (LERAP) Scheme. Before each spraying operation from a horizontal boom sprayer or broadcast air assisted sprayer either a LERAP must be carried out in accordance with CRD published guidance or the statutory buffer zone must be maintained. The results of the LERAP must be recorded and kept available for inspection for three years. Do not contaminate water with the product or its container.
Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

(c) Storage and disposal
KEEP IN ORIGINAL CONTAINER tightly closed in a safe place.
RINSE CONTAINER THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add the washings to the sprayer tank at the time of filling and dispose of container safely.
DO NOT RE-USE CONTAINER FOR ANY PURPOSE.

BRAVO 500
A suspension concentrate formulation containing 500 g/l (40.4% w/w) chlorothalonil.

Signal word:
Warning

Hazard statements:
Suspected of causing cancer.
May cause allergic skin reaction.
Causes serious eye irritation.
Harmful if inhaled.
May cause respiratory irritation.
Very toxic to aquatic life with long lasting effects.

Precautions statements:
Keep out of reach of children.
Obtain special instructions before use.
Wear protective gloves/protective clothing/eye protection/face protection.
IF ON SKIN: Wash with plenty of soap and water.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
IF exposed or concerned: Get medical advice/attention.
Collect spillage.
Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

Supplemental information: To avoid risks to human health and the environment, comply with the instructions for use.

IMPORTANT INFORMATION

FOR USE ONLY AS AN AGRICULTURAL FUNGICIDE
For use on: winter and spring wheat and winter and spring barley

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS.
DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be carefully read in order to obtain safe and successful use of this product.

DISEASES CONTROLLED

BRAVO 500 contains chlorothalonil, a non-systemic broad spectrum fungicide for use on winter and spring wheat and winter and spring barley. When sprayed onto foliage it provides long lasting protection. Best results from this protectant property are obtained by treatment before disease enters the crop or at the first sign of attack.

BRAVO 500 can be used to control the following diseases

**Winter and Spring Wheat**
Protection against Septoria Leaf Spot (*Mycosphaerella graminicola*) and Glume Blotch (*Leptosphaeria* (syn. *Septoria* nodorum))

**Winter and Spring Barley**
*Rhynchosporium secalis* [moderate control]. Barley spotting control is also achieved when used as part of a programme with other fungicides.

It is particularly important to achieve a good spray coverage of all foliage.

CROP SPECIFIC INFORMATION

**Wheat**
Protection against Septoria Leaf Spot (*Mycosphaerella graminicola*) and Glume Blotch (*Leptosphaeria* (syn. *Septoria* nodorum))

**RATE OF USE**
Apply **2.0 litres in 200 litres** of water per hectare as a MEDIUM spray (as defined by BCPC) at a pressure of at least 2.0 bar.

**TIMING**
*Growth stage 30–32* (2nd node detectable). BRAVO 500 may be applied **once** at up to maximum individual dose of 2.0 l/ha if *Septoria* is evident and/or conditions are favourable for the spread of the disease. This may give protection against the spread of *Septoria*.
*Growth stage 33–65* BRAVO 500 will provide protection against *Septoria* on the flag leaf and ear and should normally be applied between the third node detectable stage (GS 33) and the mid flowering stage (GS 65). For best results apply up to 2.0 l/ha between the third node detectable stage (GS 33) and the flag leaf fully emerged stage (GS 39).
The activity of BRAVO 500 against Septoria may be reduced in the presence of serious mildew infection. If mildew is also a problem combined use of BRAVO 500 and a suitable mildew fungicide is recommended.

**Barley**
*Rhynchosporium secalis* [moderate control]. Barley spotting control is also achieved when used as part of a programme with other fungicides.

**RATE OF USE**
Apply **2.0 litres** in a minimum of **200 litres** of water per hectare as a MEDIUM spray (as defined by BCPC) at a pressure of at least 2.0 bar.

**TIMING**
Apply the first application as soon as disease is first detected in the crop. A second application may be made before the beginning of flowering (GS 61) if severe *Rhynchosporium* pressure occurs or if there is a risk of leaf spotting.

**MIXING AND SPRAYING**

**Preparation of Sprayer:**
Ensure that the sprayer is clean and correctly set to give even application at the required volume.

Half fill the spray tank with clean water and start agitation. Slowly invert the container several times and add the required amount of BRAVO 500 to the sprayer using a filling device (e.g. induction hopper) or by direct addition to the spray tank. Rinse the container clean. Preferably use an integrated pressure rinsing device or manually rinse three times. Add washings to the sprayer at the time of filling. Agitate during completion of filling and while spraying. Do not leave in spray tank for long periods without using.

**Volume of Water and Spraying:**
See individual crop recommendations for recommended water volume.

**After Use:**
Dispose of rinsed container according to the DEFRA Code of Practice.

This product is to be used only in accordance with the recommendations and instructions given on the labels provided with the pack.
