CALARIS TANK MIX LIST

The following tank mixes have been tested for physical compatibility with CALARIS at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance therefore, use is at the user’s own risk. Syngenta UK Ltd will support 2-way tank mixes of CALARIS with any of the fungicides and herbicides listed. For further information on compatibilities, contact Syngenta UK Ltd on 0800 169 6058.

**NOTES**

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

*When CALARIS is tank mixed with PEAK, a non-ionic adjuvant does NOT need to be added.
**When CALARIS is tank mixed with MILAGRO 240 OD, an esterified rapeseed oil does NOT need to be added.
***Nutrel trace elements are all supported/tested by Nutrel.

1 Continuous agitation required at all times
2 Supported by Headland (FMC)

CALARIS is INCOMPATIBLE with Nutrel Maize Micro Booster.
LERAP: Category B
Rainfastness: 1 hour

Use plant protection products safely. Always read the label and product information before use.
